## CHART REVIEW MANAGER

IDinc's Chart Review Manager allows organizations to create their own screen and data elements to facilitate data gathering for any Quality Indicator and Measure.

The system accommodates an unlimited number of indicators / measures and for each indicator an unlimited number of data elements can be created. Drop down, look up, and multiple choice fields can be accommodated, allowing the organization to customize every aspect of the data gathering process. It also Interfaces to other systems to gather patient and physician data for Inpatient Quality Indicators.

An adhoc report generator allows an unlimited number of reports to be designed and made accessible only to authorized users. Data retrieved by the Report Generator can be converted to Excel or other electronic formats for submission to external agencies.

### Example of uses

- Inpatient Quality Indicators such as Mortality Review
- Patient Safety Indicators such as Unsafe Abbreviations
- Pediatric Quality Indicators
- Blood Utilization
- Transfusion Reactions
- Unplanned Return to Surgery or ER
- Moderate Sedation
- Adverse Drug Reactions

# CHART REVIEW MANAGER

## Major Features and Functions

- User definable Indicators and Measures
- Interface to Patient and Physician Demographic data
- Unlimited number of data elements per Indicator or Measure
- Link to Internal Policies and Regulatory websites for reference
- Create your own reports, excel, electronic files
- Limit access to data based on user roles
- Workflow driven process customized to organization's policies
