## PEER REVIEW MANAGER

IDinc's Peer Review Manager is designed to accommodate the Joint Commission's Focused Professional Practice Evaluation (FPPE) and On-going Professional Practice Evaluation (OPPE). It coordinates the review of Physician's quality of care through individual peers and committees.

A secure portal is used to report questionable practices on a confidential basis. Based on the organizations policies, the workflow engine automatically assigns the initial case review to the appropriate quality personnel. When necessary and applicable, Quality Indicators are assigned to the case and each involved physician is referred to peers and/or committees for further evaluation and possible action or recommendation.

With the Peer Review Manager you can watch for "sentinel events" and bring patterns of recurring or clustered problems to management's attention.

All data gathered through the Peer Review process is available on a physician activity profile summary to be used for credentialing and reappointment.

# PEER REVIEW MANAGER

## Major Features and Functions

- Electronic Interface to other systems for Patient and Physician data
- Reporting of questionable practice on a secure portal
- Workflow driven process customized to organization's policies
- Multiple Physicians and Indicators assigned to the same case
- Generate Peer Review Forms automatically
- Facilitate paperless processing with electronic reviews done on-line
- Assess delivery of care and physician behavior on multiple dimensions
- Monitor the effectiveness and productivity of the Quality Department with sophisticated reports.
