

FormLeaf converts paper forms into electronic forms that are completed and signed on tablet devices and automatically inserted into patients' electronic medical record.

Convenient • Simple • Secure

Products

Address all of your healthcare organization's form management needs with FormLeaf applications. Save time and save money with our forms solution, which can be implemented independently or as an integrated suite.

Forms Tree

Clinicians turn to the Forms Tree to choose a form, merge it with patient data, render it on tablets such as the iPad, have patients and clinicians sign it with a stylus, and automatically insert it into patients' electronic medical record.

- Interface to admitting system for patient data
- Complete forms easily with keyboard and stylus
- Automatically insert completed forms into EMR

Forms Manager

The Forms Manager manages the lifecycle of all your forms. It routes modified or new forms for commenting, notifies reviewers via emails, keeps track of approvals, and inventories approved and retired forms for reference.

- Route forms for commenting and approval
- Email managers when a form is due for review
- Archive retired forms

Forms Workflow Engine

The Forms Workflow Engine replaces administrative forms such as material requisitions and purchase requests, with computer eForms that can be routed and completed online

- Create eForms for online completion
- Route eForms and notify via email
- Interface data to other systems
